

ECLIPSE 706 ENHANCEMENTS AT A GLANCE

Since its release in 2013, the model 706 has become the market leader in GWR transmitter performance.

Here's why:

01

Improved GWR Signal Strength

Stronger signal with patented circuitry results in best-in-class Signal-to-Noise Ratio. Provides increased reliability in tough low DK applications

02

Encapsulated Electronics

Improved protection against moisture, vibration, physical damage...

03

Enhanced HF Connection

04

Graphic Display

Echo Curve, Trending and WizardHelp Info

05

Advanced Diagnostics

Including pro-active build-up detection

Automated Echo Capture
on Diagnostic Event

06

Enhanced DTM "PACtWare"

07

Die Cast Dual Compartment Housing
Lighter and easier to open

08

HART7

09

Standard SIL2 Certified

10
